

## **RECKSON GOES ELECTRIC!**

### ***Electric Vehicle Charging Stations Mark Latest Sustainability Initiative***

**White Plains, NY – September XX, 2013** – Reckson, a Division of SL Green (NYSE: SLG), announced today the next step in its market-leading environmental program: the installation of electric vehicle (EV) charging stations at 17 suburban commercial office properties.

Installed at New York properties, including 360 Hamilton Avenue, 140/150 Grand Street in White Plains, and 100, 200 and 500 Summit Lake Drive in Valhalla, are state-of-the-art facilities to be used by tenants' employees. Landmark Square and 680, 750, 1010 and 1055 Washington Blvd in Stamford are the Connecticut properties that will be equipped with the charging stations.

“Reckson/SL Green continues to provide its tenants with a best- in-class experience, offering unique portfolio amenities through cutting edge technology,” said John Barnes, Reckson/SL Green senior vice president and managing director who added that this proactive approach will ensure the infrastructure is in place as demand for charging stations continues to rise.

The program is designed to benefit tenants who own both electric vehicles that run solely on electric power, as well as plug-in hybrid electric cars (PHEV's), which combine battery and gas-powered technology. Standard *electric* vehicles offer ranges between 60-90 miles and luxury models offer ranges as much as 265 miles. PHEV's offer a range of 11-35 miles on electric before automatically switching to a gas-powered engine providing an additional range of 345-525 miles.

Reckson selected ChargePoint, the largest international network of EV charging stations with over 12,000 public charging stations worldwide, to provide its dual electric vehicle charging equipment, allowing two EV owners to charge simultaneously. Owners who set up ChargePoint accounts to take advantage of the stations benefit from other program amenities including electronic billing and email notification for space availability and EV charge completion.

“With interest in in EVs continuing to grow, we are pleased to partner with ChargePoint to provide this critical equipment in supporting of the use of high efficiency vehicles,” according to Jay Black, Reckson/SL Green director of sustainability, who added that according to national statistics, EVs with a range of 60 miles could satisfy 83 percent of America’s daily driving needs, while a range of 120 miles could satisfy 95 percent.

**About SL Green Realty Corp.**

SL Green Realty Corp., New York City's largest office landlord, is the only fully integrated real estate investment trust, or REIT, that is focused primarily on acquiring, managing and maximizing value of Manhattan commercial properties.
