**PLATINUM**

## What does this mean?

### Connectivity

Five or more high-speed internet providers are available (fiber or fixed wireless) giving tenants options at a competitive rate.

A landlord-owned fiber backbone is ready to enable faster deployment of services and reduce installation time for new tenants.

Fiber connectivity is ready to deliver high-speed internet to tenants.

There is fiber fully distributed across the building for at least one provider to provide tenants with faster installation time and minimum disruption.

### Infrastructure

The space allocated for service provider equipment is secured and dedicated to improve data security and reduce risks of accidental damage.

There are diverse points of entry on different sides of the building and diverse internal routes to telecommunications room(s) or riser(s), to prevent single points of failure.

There is spare capacity at the building points of entry to enable faster installation times and minimum disruption for new internet service providers.

There is capacity available throughout at least one riser to enable faster installations of new connectivity services.

There is space available in the telecommunication room(s) to accommodate new internet service providers, enabling faster installation times.

### Access Readiness

There is a signed access agreement available with at least one internet service provider to speed up installation and offer full transparency to tenants.

There is a standardized access agreement on file to expedite future installations of internet service providers.

There is a tenant connectivity guide available to assist tenants in getting connected faster.
