An overview of the experience at 919 Third Avenue

Category	Your experience at 919 Third Avenue	Regular building experience
 Mobile and Internet	Enjoy unparalleled digital connectivity with top-tier internet providers, powered by robust fiber infrastructure for the ultimate online experience throughout the building.	Expect frustrating interruptions and dead zones as you move throughout the building due to patchy digital connectivity.
 Set-up	Enjoy seamless and effortless internet setup with multiple high-speed providers at your fingertips with streamlined legal contracting. Ensuring you easily find the perfect match for your needs and enjoy a smooth, hassle-free digital experience.	Experience a tedious and slow process to setup your internet connection.
 Future-ready	To meet your needs well into the future, the building is equipped with ample spare capacity throughout, including the risers, points of entry and telecommunications rooms. This ensures the building can accommodate new and emerging technologies, providing you with the flexibility and adaptability you require.	Risk future problems arising from an internet connection and mobile connectivity that can't keep up with your growing needs.
 Resiliency	The building's robust infrastructure, including multiple entry points and diverse and secure risers and telecommunications rooms, mitigates against almost all risks to uninterrupted connectivity.	Experience frequent productivity loss and general frustration resulting from your vulnerable, and poorly secured internet infrastructure.

Connected building highlights at 919 Third Avenue

Mobile and Internet

- Strong mobile signal from at least one mobile operator means your calls don't drop.
- Free Wi-Fi in amenity areas allows you to be connected throughout the building.
- Easily install fixed wireless, satellite and mobile equipment with dedicated space and cable pathways to risers on the rooftop.

Set-up

- Diverse points of entry means your connection is robust.
- Install times are minimised with ISP connection points present across the floors of the building.
- Easier service installation enabled by spare capacity within the below-ground telecommunications cable pathway.
- Secure access to risers on each floor prevents unauthorized access and accelerates the installation of connectivity services.
- Protected routing enabled by a top-to-bottom riser expedites the installation process.

Future-ready

- New internet service providers can be installed quickly with available space in the telecommunications room.
- Signed ISP agreements are available to streamline new connections.
- Standardized ISP agreements are available to streamline new connections.

Resiliency

- Physically diverse routes for your internet connection on different sides of the building means your connectivity is robust.
- Your connection is safeguarded by secure space for telecommunications equipment.
- Multiple telecommunications rooms means you can safeguard business-critical services.
- Connectivity infrastructure in the telecommunications room is protected from flooding.
- An audit of the telecommunications installation verifies best practices are followed.
